The following items are needed to produce an estimate. Please provide the information requested in an email to us and we will look over your information and be in touch.

1. Your complete contact information, including name, phone number, email address, address of home/building to be moved/raised and location the home/building is going to if being moved.
2. Four pictures of the structure from a distance back so we can see the building and surrounding property.
3. A rough drawing of the outside dimensions and floor joist layout on the same drawing. (Just a simple sketch is needed, not exact dimensions, take a picture and include it in your email).
4. What type of foundation the building is currently on; i.e. slab, crawlspace, full block basement. And also what you would like to put it on.
5. If there are any masonry fireplaces or chimneys in the building, please provide the dimensions, a brief description and pictures of structure.
6. If the building is being moved, I will need the height of the structure from the tallest peak to the bottom of structure, not including foundation.
